

FALKEN PORSCHE 911 GT3 R (TYP 991)

Instructions:

Tools: Craft knife
Estimated Time Required: 1.5hrs
Results may vary.

- Carefully cut out the model along the edges and fold all the grooved lines. The fold below the side windows must be folded upwards
- Rear: Insert tabs 1a into slots 1 (a), then tabs b, c and d mesh with each other and finally snap the tabs into the slots 1 (e).
The rear is now closed (Fig. 1).
- Rear: The tabs f, g, h, i and j mesh and the 1k tab into the 1 (k) slot snap into place.
- Front: Insert tabs I into each other and then close the bow at the bottom.
- Front: Insert the tabs m, o, p and q into the slots (m) to (q). The tab n will be pushed under the body.
The body is now closed (Fig. 2).
- Spoiler: Insert the r tabs into the slots and fold the carriers up. Fold the component so that the vertical fins are created and the beams with the Tabs s lie against each other on the back. Finally insert the spoiler in the body. (Fig. 3). Congratulations: the model is ready.
